Quick Setup **Guide**

Cryptocash
ATM

1 Remove from docking station

2 Open front door
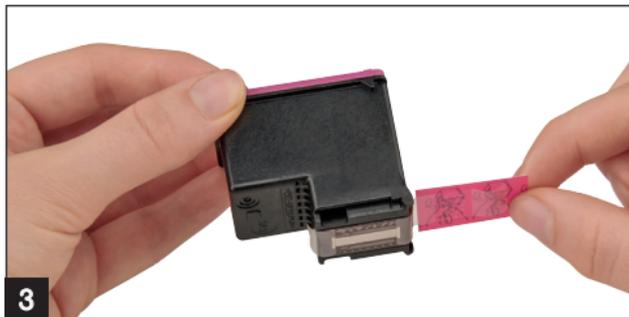

3 Remove film from print head

4 Insert cartridge

Be careful, do not touch any contacts or the print head!

5 Close front door and charge for 2 hours

6 Switch on

7 Print your SSID & Password!

8 Put the Cryptocash ATM always back into the docking station after printing!

2. Download and setup your **Cryptocash wallet app**

Download on Google Play
or AppStore:

Optional registration:
If you want to take advantage of the
digital signature feature for the back
of the Decentralized currency note,
you need to register your personal
information and identify yourself.

3. Connect your **Cryptocash ATM**

Click on "Login using QR-code"
and scan the QR code...
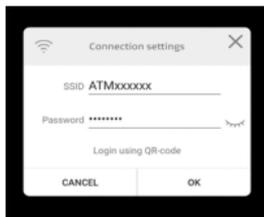

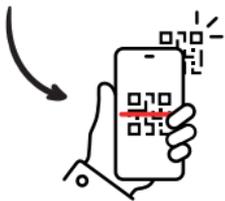

...or manually enter the **SSID and password**,
which can be found on any of these 3 places:

| imprint after reset or first imprint | packaging | label on the Cryptocash ATM device |

Connection settings

SSID ATMxxxxxx

Password ••••••••

Login using QR-code

CANCEL   OK

Device name:
Cryptocash ATM

Manufactured for:
PrintDreams Intl AB

Made in Austria

SSID: ATMxxxxxx
PW: XXXXXXXX

1 Open the Cryptocash Wallet app and enter your passcode to access your account (or use biometrics if enabled).

2 Select the "ATM Print" option from the main menu or from the menu of specific currency.

3 Select or enter the amount you want to convert into a decentralized currency note.

4 Wait for the Cryptocash ATM to connect. Position your device on the note and swipe right until you hear a beep.

Blue position LEDs
Use the blue lights to position your imprint.
The light shows the top and bottom of
your imprint.

	Behaviour	Description
Beep once	Beep once	Print job transmitted
Beep twice	Beep twice	Print is complete, Cleaning cycle finished
Beep continuously	Beep continuously	Print head warning: put it back on the docking station
Beep continuously	Beep continuously	Error – switch it off/on

6. Print head **cleaning**

The cartridge is a sensitive part and requires special care. Especially when the Cryptocash ATM is not used on a daily basis, more intensive cleaning is necessary. We recommend weekly cleaning.

Automatic cleaning cycle
Whenever the Cryptocash ATM is taken from the docking station, the print head is cleaned automatically. The intensity of cleaning increases the longer the Cryptocash ATM is not used.
1. Take Cryptocash ATM from docking station
2. Hold briefly in the air (wait for ink to disperse)
3. Put on paper & print!

Before printing, we recommend doing a test imprint.

Manual print head cleaning
1. Take a slightly dampened piece of cloth
   (only pure water, no cleaning agent!)
2. Take the Cryptocash ATM out of the docking station
3. Wipe the print head from top to bottom
   (never sideways, as this could damage the
   cartridge)

For a more intense clean try the quick cleaning in the app.

7. The Cryptocash ATM **at a glance**

1 Front door

2 Print head of cartridge

3 Sliding wheels

4 Magnets

5 Reset hole

6 Optical sensor
